Drug discovery
programmes supported

about the o2h Kickstarter

The o2h Kickstarter Awards were first launched in 2022, to provide new therapeutic-focused startups with a 'boost' of chemistry to help achieve initial milestones to enable them to generate the data required to unlock further funding.

To date, we have provided more than 20 Kickstarter awards in the UK, Australia, the USA, and Europe. Many of these companies, including Sevenless, Kuano, Five Alarm Bio, Origami, and Alevin, have continued their growth off the back of this award since joining the program in 2022, and we are proud to have supported them through their early launch.

about o2h discovery

o2h discovery has a multi-modality integrated drug discovery platform, operating from Ahmedabad, India and Cambridge, UK. We have the in-house capability to execute hit-lead-optimization programs leading into patent and IND filing with expertise in discovery chemistry, biology, pharmacology, and the ongoing project management of pre-clinical development.

benefits

team

A dedicated team of six FTE synthetic chemists of which two are experienced and four are trainees

cost &
duration

Six synthetic chemists at a fraction of the usual price for up to six months

additional
support

Receive 100 complimentary ADME points and save 20% on Biology FTE

inventory

Access to a large inventory of chemicals and reagents for synthesis

testimonials

"We are absolutely delighted to win an inaugural kickstarter award. It's fantastic that one of Britains top CROs is prepared to back companies like ours."

Jason Rutt
CEO

"The o2h Kickstarter competition promises to be an excellent scheme allowing early-stage companies like ours to get access to synthetic chemistry."

Chris Moody
Co-founder
