About the o2h Discovery Platinum Partners

Building on the success of our o2h Kickstarter Awards, we are inviting investors in start ups, whether they be Venture Capital, Venture Builders or Technology Transfer offices, to provide their new investments with a Kickstarter Award on 'Auto Pilot'. This approach allows us to distribute more awards to companies helping them access this crucial support through their Pre Seed and Seed rounds.

We all know how tough it is to advance biotechs through the early stages, and our Platinum Partners will be working hard to support these companies with funds and more. This award aims to provide a chemistry boost to help recipient companies achieve their project milestones.

About the o2h Kickstarter Award

The o2h Kickstarter Awards were first launched in 2022, to provide new therapeutic-focused startups with a 'boost' of chemistry to help achieve initial milestones to enable them to generate the data required to unlock further funding.

To date, we have provided more than 40 Kickstarter awards in the UK, the USA, Australia, Israel and Europe. Many of these companies have continued their growth off the back of this award since joining the program in 2022, and we are proud to have supported them through their early launch.

Kickstarter Benefits

Team

A dedicated team of six FTE synthetic chemists of which two are senior and four are junior chemists

Cost & Duration

Six synthetic chemists at a fraction of the usual price for up to six months

Additional Support

Receive 100 complimentary ADME points and save 20% on Biology FTE

Inventory

Access to a large inventory of chemicals and reagents for synthesis

Testimonials

"We're excited to announce the award of the o2h Kickstarter to InnoVira Tx, a Persephoni portfolio company focused on developing small molecule medicines. The Kickstarter award will accelerate our early discovery and drive generation of candidates for our lead program. The high quality medicinal chemistry services provided by o2h Discovery are uniquely designed to help startups such as InnoVira reach value milestones more rapidly."
